First Draft

REPLAY

INTERNAL

ONE MAP

Filled type is built. Outline is not.

INTERNAL

ONE MAP

Filled type is in the code today. An outlined word is the brief, and it is not built. Do not write both as if they were the same thing.

IN THE CODE

Shipped, and named as it is.

THE BRIEF

Asked for. Not in the code yet.

SEGMENTS

THREE BUSINESSES. ONE PRODUCT.

01

PICKUP

In the code: a slot, a fee, a waitlist, a cancel, balanced sides. The live site is one members' football club at Play 365.

02

PRIVATE CUP

In the code: tournaments, fixtures, tables. The media kit sits behind the matchdayKit switch.

03

CORPORATE

The brief is a company auction with no payment gateway to set up. The code has an auction switch. Nothing is named corporate.

ROLES

WHO THE CODE KNOWS

01 **PLAYER**

Books. A suspended member can read, and cannot book.

02 **OWNER, ADMIN**

The club, and any of its games. They change the crew.

03 **HOST, CO-HOST**

Roster, cash, live scoring. Co-hosts run it like the host.

04 **SCORER**

Scores, and does not run the game.

05 **TREASURER**

The books. Approves paid. Their own booking confirms with no gateway fee.

06 **AUCTIONEER**

Runs the auction room, with whoever runs the tournament.

THE GROUND

A PLACE, NOT A LOGIN

Platform admins curate grounds. A community can request one. The books can pay the ground. A ground operator with their own login is the brief. That role is not in the code.

TWO PLANES

PUBLIC, AND SIGNED IN

01

PUBLIC

A game the club opens. Anyone with the link follows the score. /live follows public games now.

02

SIGNED IN

Roster, money, the season hub, the console, the crew.

03

THE BROWSER

A public browser of past seasons across communities, like a live score app, is the brief. It is not in the code.

SWITCHES

ADD-ONS, AS THEY EXIST

Platform default. The community beats it. The tournament beats the community. Only a platform admin grants them.

auction	Squads bought at auction.	IN CODE
xp	On profiles, tables, reports, wrapped.	IN CODE
matchdayKit	A media kit after every match day.	IN CODE
chipIn	The word in the product is contribution.	IN CODE
watch	A paired watch can record a goal into the live console.	IN CODE

THE LIVE PAGE

ONE CLUB.
NOT TRACTION.

firstdraftfc.com is a members' club. Weekly 8v8 at Play 365, Bengaluru. Book, balanced sides, a season, XP. ₹200 a session. Sample figures on that page are marked sample. They are not a count of the platform.

XP

ONE RUBRIC. THE PLATFORM'S.

The brief asks for a matrix per community. loadXpRubric reads one platform row. The schema says the rubric stays the platform's. Goals and assists pay by role. A community cannot bring its own matrix today.

LABEL THESE

THREE GAPS, LEFT OPEN

TARGETS BRIEF

Games, goals, distance, as the player's own record. Not in the code.

CALORIES BRIEF

Not in the code. Do not draw them on a player page.

HISTORY BRIEF

A public browser of seasons across clubs. Not in the code. The season hub is inside the signed-in club.

MONEY

PAISE, AND ONE RULE

Integer paise. How a game is paid comes from payModeOf and payByFor: gateway, manual, or choice. Do not read a payment mode inline. Chip-in is a switch. The sentence uses the word contribution.

DO NOT BLUR

TWO GAPS STAY LABELLED

The live homepage is one Bengaluru community, First Draft FC, at Play 365. The XP rubric is one rubric for the whole platform, not one per community. Say both. Do not bury them in a roadmap.

THE CLUB YOU PLAY FOR GETS A RECORD.
